The Mixer FineMIX has been designed for food industry. Main application of the machine is in meat processing plants to mix and to salt meat of diverse structure. The mixer is assembled from high quality stainless steel. The machine meets the strongest hygienic and safety requirements of European standards.

**Construction elements and utility attributes:**

- The construction of mixing elements applies the attributes of paddles and spirals. This type of mixing elements is increasing the efficiency of mixing and that way shortening the technological process.
- Emptying of the mixer occurs through two emptying openings. In the time of emptying, both of mixing elements are pushing the mixture to the openings, what assures excellent clean emptying.
- The opening mechanism of the emptying flaps is constructed so that the mixer can be opened and closed by one hand.
- The assessment of the mixing elements allows simple removal and cleaning outside the mixing hopper.

Type	Fm 330	Fm 550	Fm 900	Fm 1200
Basin volume [ l ]	330	550	900	1200
Max. Filling [ kg ]	220	440	660	880
Power [ kW ]	2x2,2	2x3	2x4	2x5,5
Weight [ kg ]	520	650	1260	1650
Dimensions LxWxH [ cm ]	150x103x140	186x103x160	220x120x160	240x120x180
El. Voltage [ V / Hz ]	400 / 50 ( 400 / 60 – on demand)			

**Remark:**

In the basic equipment two-speed engines secure the drive of both mixing elements. On demand mixer will be delivered mixer with interval and variable drive of the mixing elements.
